

# Governor's Commission for a Drug Free Indiana

*A Division of the*

## Comprehensive Community Plan

**County: Wayne**

**LCC: Drug Free Wayne County Partnership**

**Date Due: January 31, 2019**

**Date Submitted: January**

**New Plan**       **Plan Update**

**LCC Contact: Patrick Ripberger**  
**Address: 2900 West Main Street**  
**City: Richmond, IN 47374**

**Phone: (765)698-6512**  
**Email: drugfreewaynecountypartnership@gmail.com**

**County Commissioners: Mary Anne Butters, Ken Paust, and Denny Burn**

**Address: 401 East Main Street**  
**City: Richmond, IN**  
**Zip Code: 47374**

## Plan Summary

**Mission Statement:** The mission of the Partnership for a Drug Free Wayne County is to promote, support and encourage the prevention, education, treatment and law enforcement of substance abuse and substance abuse related issues including alcohol, tobacco and other drugs.

**History:** Organized in 1987, the local coordinating council in Wayne County has completed 27 years of service in the prevention, education, treatment, intervention, justice and law enforcement of alcohol, tobacco and other drug issues. In 1995, the LCC received Articles of Incorporation under IC 23-17-1-1 et seq. for "any lawful purpose," but has since gone back under the umbrella of Wayne County Government. The Partnership operates as a community coalition with the membership comprised of any interested citizen willing to serve their community in this area. The membership has evolved over the years to include teachers, school counselors, substance abuse program directors, program counselors, clergy, judges, attorneys, law enforcement, not for profit agencies, senior citizens, government officials, doctors and community members.

The Partnership operates with a Board of Directors and employs a part-time Executive Director. The Wayne County Auditor's office is responsible for the fiscal operations of the Partnership. Upon the recommendation of the funding committee, the Wayne County Commissioners allocate funding on an annual basis and the County Council appropriates the funding. The Auditor's office then distributes checks to awarded agencies. The Partnership on rare occasion has awarded funding mid-year for worthwhile programs, following the same protocol.

The Partnership has been instrumental bringing new initiatives to the Wayne County community. Teen Court was started as an alternative for juvenile probation officers for non-violent first-time offenders. The Court, now discontinued, operated for several years through the Probation Department. Hope House Addiction and Recovery Services is a treatment program housed on the grounds of the Richmond State Hospital serving indigent clients with substance abuse. The Hope House was modeled after "The Healing Place" program in Louisville, Kentucky. These two initiatives were brought to Wayne County through our Comprehensive Plan.

In 2005 the Partnership served as the lead agency for a Drug Free Communities Grant administered by DOJ. Collaboration of several agencies and school districts worked together to receive this funding. Although we were not funded in subsequent years, it did set our coalition in the direction of bringing additional resources for our partners and community. In 2007 we applied for and were awarded a Strategic Prevention Framework State Incentive Grant. This grant allowed us to hire 2 new full-time staff to lead this initiative and has brought many new community members into the efforts of the Partnership. This grant expired in 2011. Additionally, our Partnership applied for and was awarded a Safe and Drug Free Schools Grant- Governor's Portion. With these dollars we were able to bring the evidence-based program "Guiding Good Choices" to Wayne County.

In 2007 the Partnership began a series of educational opportunities we named "Lunch and Learn." At the Lunch and Learns we have covered the areas of abuse, addiction, treatment and law

enforcement. The L and L's have been well attended and have exceeded the expectations of the Partnership. The most recent initiative and grant the Partnership received is the Drug Free Communities (DFC) grant from SAMHSA. The funds from this grant enabled the hiring of a full-time DFC grant coordinator and an increased focus within the community on youth substance abuse prevention.

**Summary of the Comprehensive Community Plan:** The Partnership for a Drug Free Wayne County works each year to accomplish its mission statement through our members and the organizations they represent, the grantees and funded programs, as well as a diverse group of citizens and programs designed to address Alcohol, Tobacco and Other Drug (ATOD) issues. Our membership has provided a stable foundation for 33 years in the ATOD arena.

Our members represent Education, Law Enforcement, Judiciary, Treatment, Civic organizations, Business, Government, Prevention, Faith Based Intervention, and Medicine. We continue to work towards consistent representation of Youth involvement in our local coordinating council.

For many years now, our plans have been written with a strong emphasis on identified risk and protective factors for Wayne County. We are utilizing the Risk Factor / Protective Factors Approach to Positive Youth Development, a research-based strategy approved by the Council for Substance Abuse Prevention (CSAP). Risk and Protective factor-focused prevention is based on a simple premise: To prevent a problem from happening, we need to identify the factors that increase the risk of that problem developing and then find ways to reduce the risk. At the same time, we must identify those factors that buffer individuals from the risk factors present in their environments and then find ways to increase the protection. Risk factors and protective factors exist in our community, family, school and peer/individual.

Several drug and alcohol concerns persist for Wayne County. Lifetime usage of marijuana is notably above the state average for 7<sup>th</sup>-9<sup>th</sup> grades as reported on the Indiana Prevention Resource Center survey, 2011. This is also the case for alcohol for 8<sup>th</sup>-10<sup>th</sup> graders. This being the case we need to continue focusing on prevention/education initiatives in the schools and youth organizations. A collaborative effort has taken hold in Wayne County to implement "A Comprehensive Prevention Approach" as defined by the Development Research Programs, Inc. in Seattle Washington. According to this model, "the foundation of an effective prevention program is a comprehensive, community-wide approach that addresses risk factors by enhancing protective factors based on established and field-tested research." As defined by this approach, Wayne County has worked to implement strategies identified throughout the plan.

Treatment/Intervention options in Wayne County continue to be a priority, both for adolescents as well as adults. Collaboration between agencies is paramount when the need exists to offer treatment options to the homeless, the indigent, and to every other socio-economic group represented. Individuals who do not have healthcare cannot afford for-profit treatment centers. Wayne County has programs designed for these individuals. Providing financial support to these agencies is a priority for our community.

Our law enforcement agencies take extraordinary steps to make our communities a safe place to live, work and raise a family. Participation in the Governor's Council on Impaired and Dangerous Driving enforcement, drug investigations and arrests, and diversion programs, are only a few initiatives that our law enforcement agencies participate in. Additionally, many community It is our obligation to work with every strategy in this plan to reduce the issues our citizens' face with ATOD. This plan is a working document that allows us to distribute funding in a fair and equitable manner that best serves the citizens of Wayne County. For the next 4 years we will address the following problem statements:

1. Adults and youth in Wayne County are using opiates and heroin.
2. Adults in Wayne County are abusing alcohol.
3. Youth in Wayne County are engaging in alcohol use.
4. Adults and youth in Wayne County are using marijuana.

Local data supports the need to address these problems in our community. The following is a history of criminal court filings:

<b>Substance/Charge</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>
Illegal Possession of Alcohol	17	20	19	24
Operating a Motor Vehicle While Intoxicated	423	310	315	461
Public Intoxication	57	37	50	88
Marijuana	108	81	102	169
Possession of Narcotic Drug	92	92	145	123

outreach opportunities have developed with the Sheriff’s Department Safe Driver Program and DARE as well as Richmond Police Department and Sheriff’s Department demonstrations with their “drug sniffing dogs.”

## Membership List

### County LCC Name: Partnership for a Drug Free Wayne County

#	Name	Organization	Race	Gender	Category
1	Josie Seybold	Comm. Corrections	W	F	Justice
